Introduction

Fulfillment provides a streamlined browser-based staff interface for library staff to move items through the ILL workflow. The stock location for this interface is <https://<your-fulfillment-domain>/eg/staff/home>. Staff with the appropriate permissions will be able to log in to place, edit, and manage requests. Permissions include STAFF_LOGIN, VIEW_CIRCULATIONS, and other appropriate holds and circulation permissions. Staff accounts will also need a working location assigned that matches their workstation location.

General Conventions

There are a few conventions followed within the Fulfillment staff interfaces.

- Fulfillment is supported for the Chrome and Firefox browsers.
- Occasionally, links will open in a new browser tab. Make sure your browser is configured to allow pop-ups from your Fulfillment URL.
- Columns in grids have several options:
 - You can click the header of a column to sort it ascending or descending.
 - You can add or remove columns by using the gear icon in the upper-right of the grid.
 - You can filter certain columns by selecting the filter button visible at the top of filterable columns.
- Actions in each information grid are available either via the **Actions** button or by right-clicking on a grid row.
- All grids have a right-click action for **Copy to Clipboard** which will allow you to copy data from a selected row.
- A hyperlinked barcode number will open the request in the **Single Scan** interface, and will show details of the request, as well as the next action for that request.
- A hyperlinked title will show you a staff view of the bibliographic record and holdings information.
- Some interfaces permit actions to be taken on multiple requests at once. Check the box to the left of each request you want to include in the action.

Registering a Workstation and Logging In

The first time you log in, you will need to register a workstation. Please refer to the username, password, and workstation name given to you by your administration. Log in with your username and password, and this will take you to the register workstation interface.

Select your location from the dropdown, and enter **staff** in lowercase letters for your workstation name. Click **Register**. If you get a message that says “This workstation is already in use,” you can click through that - it’s OK to reuse a workstation name in this context.

Workstation Administration

Please register a workstation.

Log in

When you log in, you will be taken to the home screen. From the home screen, you have several links, including:

- **ILL Processing** - This takes you to the ILL Management interface, where all of your request processing takes place.
- **Pending Requests** - This takes you to the ILL Management interface with the *Pending Requests - Requests By My Patrons* subtab selected.
- **ILL Pull List** - This opens a full version of the pull list, with several options to filter by pickup library and shelving location.
- **Bibliographic Search** - This will open a new tab and take you to the catalog where you can search and place ILL requests.
- **Fulfillment Documentation** - This will open a link in a new tab to this documentation.
- **Workstation Administration** - This gives you a few workstation options, including disabling sounds; registering another workstation; and a few other settings.

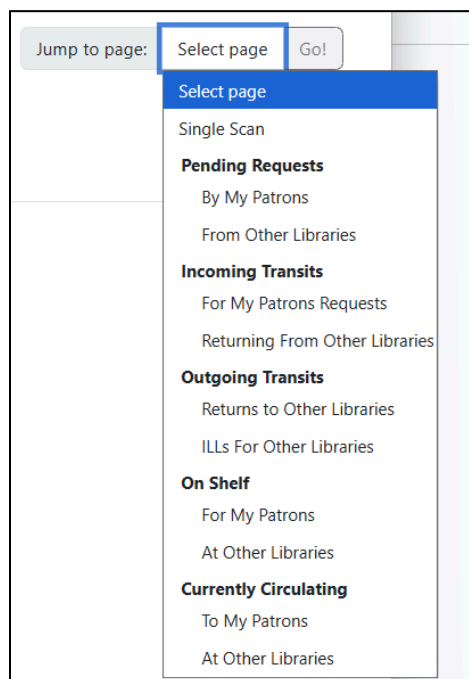

At the top-left is the home button. From all places in the interface except the catalog, you can click this icon to return to this home screen. At the top-right your login and workstation are displayed, as well as a menu to adjust the display modes - light mode, dark mode, and auto are available. Also at the top right is a user icon linking to a menu to change the operator, log out, a link to tell you about the software, and a link to show you available shortcuts.

Management Interface Overview

Starting from the splash screen, you will select **ILL Management** to open the management interface. This is where all of your request processing will take place. This will open to the **Single Scan** interface by default.

At the top-right is a bar that will allow you to jump directly to a specific tab within this interface.

Below that is a link to **Search the Catalog**, which will open a new tab and take you to the catalog where you can search and place ILL requests.

Along the left side of the management interface are links for the following:

- Single Scan
- Pending Requests
- Incoming Transits
- Outgoing Transits
- On Shelf
- Currently Circulating

These interfaces are described in greater detail below.

staff_jp-loving @ JP-LOVING-staff

ILL Management

[Incoming Transits](#)

[Outgoing Transits](#)

[On Shelf](#)

[Currently Circulating](#)

Single Scan

The first tab in the ILL Management Interface is **Single Scan**. When you select the **ILL Processing** button from the home screen, you will be taken to this tab by default. This tab presents a single scan box for barcode entry. When you scan a barcode, this interface will prompt you for the next logical action to be taken with the item in hand. If more than one action can be taken, those options will be presented as a separate set of buttons.

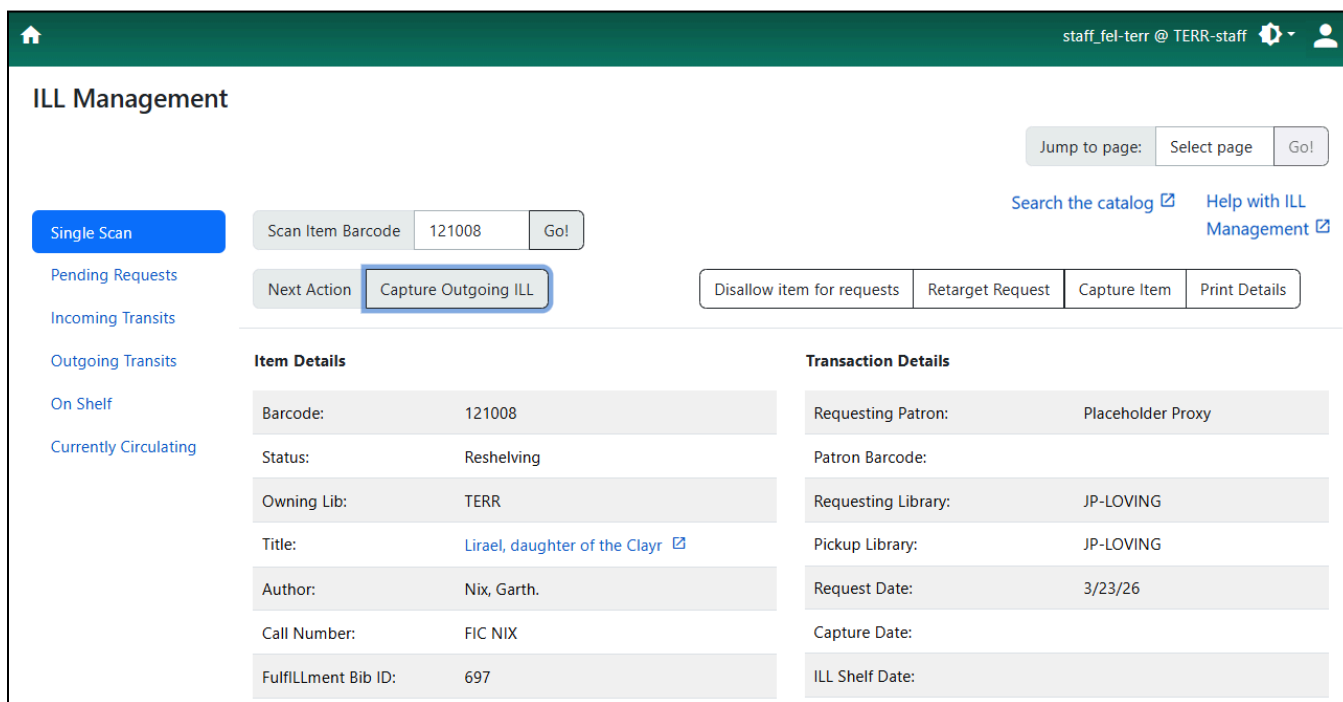

Capturing requests via the single scan interface will allow items adjacent to the targeted barcode to also fill a request. If library staff can't find the precise targeted copy, another copy on the same metarecord will be able to fill the request.

In the event of a barcode collision, the staff user will see a modal with item details and action options for each barcode in order to choose the correct item & actions.

Single Scan: Sending a Loan

Scan your item in the entry box. You shouldn't need to click go if you are using a barcode scanner. If you are using keyboard entry, type the barcode and click **Go**.

Fulfillment will retrieve the loan information for your item. If the loan is for a patron at a Connector library, you will see the patron name and barcode. Loans for non-Connector libraries will show the proxy name and barcode.

The screenshot shows the ILL Management interface. At the top, there's a header with a home icon, the user 'staff_fel-terr @ TERR-staff', and a settings icon. Below the header, the 'ILL Management' title is on the left, and on the right, there's a 'Jump to page:' section with 'Select page' and a 'Go!' button. A search bar with 'Search the catalog' and a help link 'Help with ILL Management' are also present. The main area has a left sidebar with tabs: 'Single Scan' (active), 'Pending Requests', 'Incoming Transits', 'Outgoing Transits', 'On Shelf', and 'Currently Circulating'. The 'Single Scan' section includes a 'Scan Item Barcode' input with '121008' and a 'Go!' button. Below this is a 'Next Action' section with a button 'Capture Outgoing ILL' highlighted. To the right of this are buttons: 'Disallow item for requests', 'Retarget Request', 'Capture Item', and 'Print Details'. The main content area is divided into two columns: 'Item Details' and 'Transaction Details'. 'Item Details' includes fields for Barcode (121008), Status (Reshelving), Owning Lib (TERR), Title (Lirael, daughter of the Clayr), Author (Nix, Garth.), Call Number (FIC NIX), and Fulfillment Bib ID (697). 'Transaction Details' includes fields for Requesting Patron (Placeholder Proxy), Patron Barcode, Requesting Library (JP-LOVING), Pickup Library (JP-LOVING), Request Date (3/23/26), Capture Date, and ILL Shelf Date.

Item Details		Transaction Details	
Barcode:	121008	Requesting Patron:	Placeholder Proxy
Status:	Reshelving	Patron Barcode:	
Owning Lib:	TERR	Requesting Library:	JP-LOVING
Title:	Lirael, daughter of the Clayr	Pickup Library:	JP-LOVING
Author:	Nix, Garth.	Request Date:	3/23/26
Call Number:	FIC NIX	Capture Date:	
Fulfillment Bib ID:	697	ILL Shelf Date:	

For this item, the next action is **Capture Outgoing ILL** and this action is focused. Alternative actions for this request can be seen to the right and include Disallow item for requests, Retarget Request, Capture Item, and Print Details.

Click **Capture Outgoing ILL**, or simply press the enter key or spacebar key to complete the focused action.

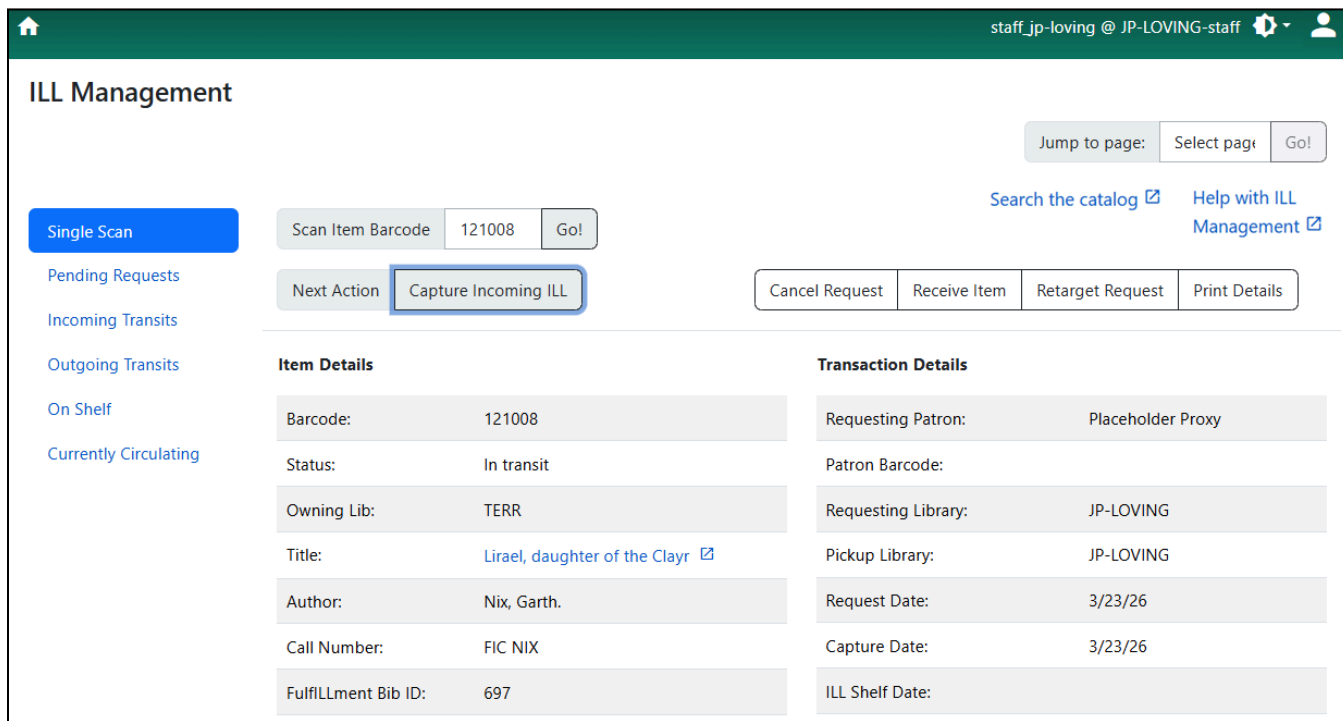

The screen will update to show the item being placed in transit.

Single Scan: Receiving a Loan

To receive requests, use the same Single Scan tab and scan or type your barcode in the entry box.

Fulfillment will retrieve the loan information. If the loan is for a patron at a Connector library, you will see the patron name and barcode. Loans for non-Connector libraries will show the proxy name and barcode.

In this example, **Capture Incoming ILL** is the default action. Alternative actions include Cancel Request, Receive Item, Retarget Request, and Print Details.

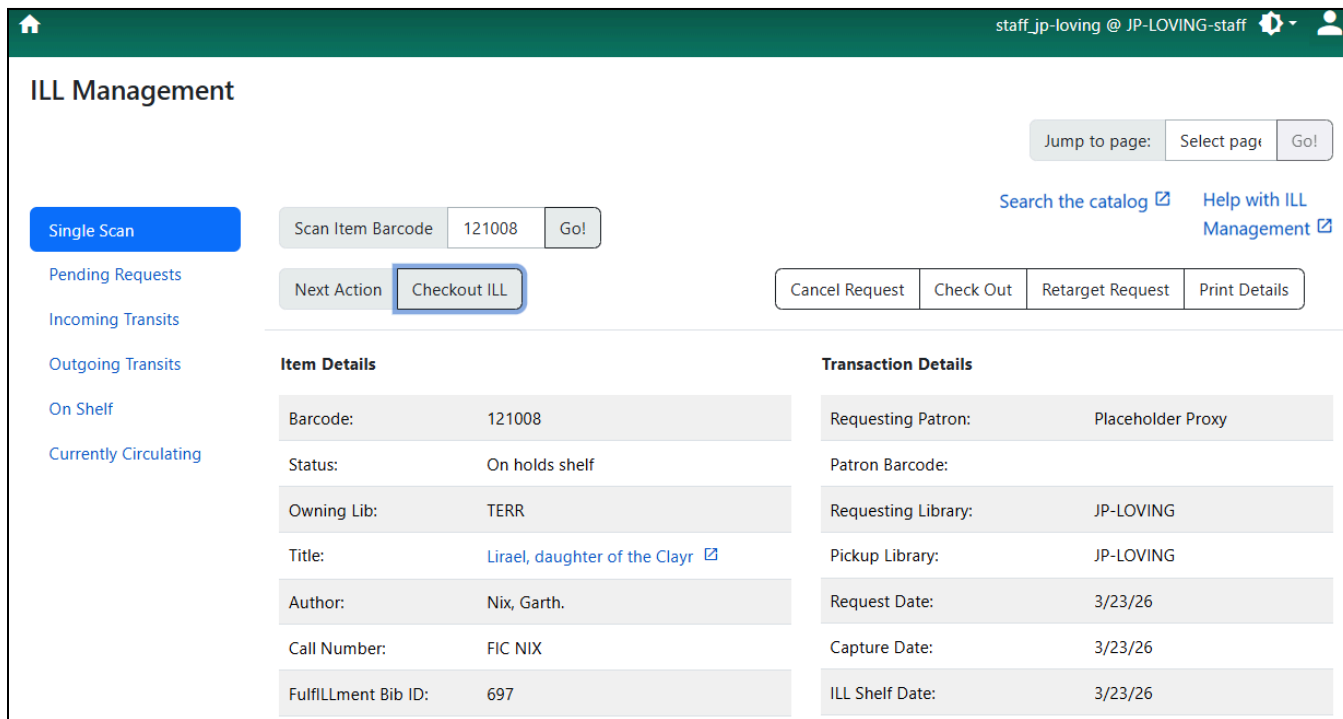

The screenshot shows the 'ILL Management' interface. At the top, there's a header with a home icon, the user 'staff_jp-loving @ JP-LOVING-staff', and a settings icon. Below the header, the title 'ILL Management' is on the left, and on the right are 'Jump to page:', 'Select page', and a 'Go!' button. A sidebar on the left lists navigation options: 'Single Scan' (highlighted in blue), 'Pending Requests', 'Incoming Transits', 'Outgoing Transits', 'On Shelf', and 'Currently Circulating'. The main area has a 'Scan Item Barcode' input with '121008' and a 'Go!' button. Below this is a 'Next Action' dropdown menu with 'Capture Incoming ILL' selected. To the right of the dropdown are buttons for 'Cancel Request', 'Receive Item', 'Retarget Request', and 'Print Details'. The interface is divided into two columns: 'Item Details' and 'Transaction Details'. The 'Item Details' column shows: Barcode: 121008, Status: In transit, Owning Lib: TERR, Title: Lirael, daughter of the Clayr (with a link icon), Author: Nix, Garth., Call Number: FIC NIX, and Fulfillment Bib ID: 697. The 'Transaction Details' column shows: Requesting Patron: Placeholder Proxy, Patron Barcode: (empty), Requesting Library: JP-LOVING, Pickup Library: JP-LOVING, Request Date: 3/23/26, Capture Date: 3/23/26, and ILL Shelf Date: (empty).

Item Details		Transaction Details	
Barcode:	121008	Requesting Patron:	Placeholder Proxy
Status:	In transit	Patron Barcode:	
Owning Lib:	TERR	Requesting Library:	JP-LOVING
Title:	Lirael, daughter of the Clayr	Pickup Library:	JP-LOVING
Author:	Nix, Garth.	Request Date:	3/23/26
Call Number:	FIC NIX	Capture Date:	3/23/26
Fulfillment Bib ID:	697	ILL Shelf Date:	

Click **Capture Incoming ILL**, or simply press the enter key or spacebar key to complete the focused action.

For Connector-enabled libraries, the Capture action will send a command to the local ILS and place the item on the Holds Shelf for the patron.

The screen will update to show that the item is on the Holds Shelf, and change the next default action to **Checkout ILL**.

Title: Lirael, daughter of the Clayr ↗	Pickup Library: JP-LOVING
Author: Nix, Garth.	Request Date: 3/23/26
Call Number: FIC NIX	Capture Date: 3/23/26
Fulfillment Bib ID: 697	ILL Shelf Date: 3/23/26

Click **Checkout ILL** or simply press the enter key or spacebar key to complete the focused action. Alternative actions here include Cancel Request, Check Out, Retarget Request, and Print Details.

For Connector-enabled libraries, the Checkout action will send a command to the local ILS to check the item out to the patron in the ILS.

Single Scan: Returning a Loan

To return loans, use the same Single Scan tab and scan or type your barcode in the entry box.

Fulfillment will retrieve the loan information. In this example, **Checkin ILL** is the default action. Alternative actions include Mark Lost, Check In, and Print Details.

Author: Nix, Garth.	Due Date: 4/6/26
Call Number: FIC NIX	
Fulfillment Bib ID: 697	

Click **Checkin ILL**, or simply press the enter key or spacebar key to complete the focused action.

For Connector-enabled libraries, the Checkin action will send a command to the local ILS to check the item in and clear it off of the patron's local ILS account.

The screen will update to show that the item is in transit back to its owning library.

Single Scan: Receiving a Returned Loan

To receive a returned loan, use the same Single Scan tab and scan or type your barcode in the entry box.

Fulfillment will retrieve the loan information. **Receive Returning ILL** is the default action. Alternative actions include Disallow item for request, Abort Transit, Receive Item, and Print Details.

Single Scan: Alternate Barcode Capture

If library staff cannot find the specific copy listed on the Pull List, but can find another copy of that title, staff can use the Single Scan interface to scan the alternate copy as long as the alternate copy is part of the same record grouping. The alternate copy will be available for capture, and following its capture it will show as in transit to the borrowing library.

From that point, the rest of the ILL process follows the steps noted above.

Single Scan: Alternative Actions & Information

The Single Scan tab can give you additional information about a request and/or an item, and can also allow you to take alternative actions.

Alternative Actions in Single Scan

Occasionally, you will scan an item in Single Scan that is in a non-ideal or uncommon state. This can include:

- Receiving an item that you neither own nor for which you have a current request.
- Receiving an item that you own and lent out, but the borrowing library did not complete the receiving and/or check out process correctly.
- Receiving an item that you own lent out, but the borrowing library did not complete the check in process correctly.
- Checking in an item that you borrowed which has an immediate next request on it at your library.

Single Scan will always try to present you with a logical option for the item in hand.

If you receive an item that you don't own, and for which you don't have a current request, you will be prompted to send the item home.

Item Details

Barcode:	121110
Status:	In transit
Owning Lib:	TERR
Title:	Sabriel
Author:	Nix, Garth.
Call Number:	FIC NIX
Fulfillment Bib ID:	696

If you receive an item that you own and lent out, but the borrowing library did not complete the receiving and/or check out process correctly, Single Scan will walk you through the steps to perform the ILL remotely. This starts with **Begin ILL for Borrower** to check the item out to the borrower (which will ensure that you get a circulation statistic for the item), and then will prompt you to complete the ILL by using **Receive Returning ILL** which returns the item to a Reshelving status at your library.

---------	----------------	-----------	------------------

Capture Rejections

TERR	121110	3/23/26
------	--------	---------

Item Details shows the following information:

- *Barcode* - the barcode of the item
- *Status* - the status of the item (Available, Checked Out, In Transit, etc.)
- *Owning Lib* - the library that owns the item
- *Title* - the title associated with the item - the hyperlinked title will open a new tab with a staff catalog view of the title
- *Author* - the author associated with the item
- *Call Number* - the call number associated with the item
- *Fulfillment Bib ID* - the bibliographic ID that Fulfillment uses to identify the record
- *Remote ILS Bib ID* - the bibliographic ID from the original (owning) ILS

Transaction Details shows the following information:

- *Requesting Patron* - the name of the patron placing the request
 - If you have a live connection to the source ILS, this will show the patron's name
 - If you do not have a live connection to the source ILS, this will show the staff proxy account name
- *Patron Barcode* - the barcode of the patron placing the request
 - If you have a live connection to the source ILS or entered a patron barcode at the time of request, this will show the patron's barcode
 - If you do not have a live connection to the source ILS, this will show the staff proxy account barcode
- *Requesting Library* - the library which initiated the request
- *Pickup Library* - the library where the requested item will be sent for pickup
- *Request Date* - the date the request was placed

- *Capture Date* - the date the item was “captured” for this request.
 - A capture is when a specific item is scanned & associated with a specific request.
- *ILL Shelf Date* - the date the item was put on the hold shelf for a patron

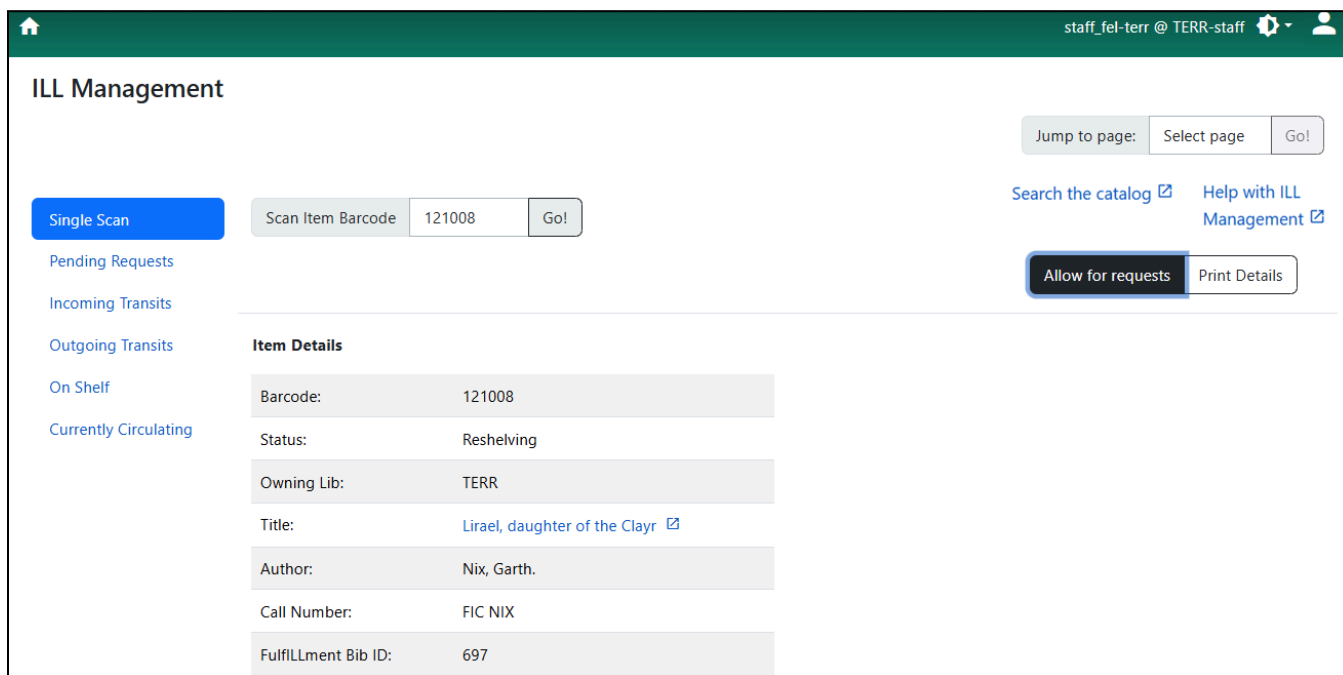

ILL Blocks for Copy shows any current or former hold blocks on the item. If there are no hold blocks on the copy, you will not see this section.

A block happens when [Disallow item for requests](#) has been set on an item. This list shows the date of the block, the staff member who set the block, the reason for the block, and whether the block is for one request or all requests. If the block is for a single request, the request ID will show in parentheses.

Block reasons and their display values are as follows:

- *Policy* - policy
- *Targeted Copy or Equivalent Not Found* - not found
- *Incorrectly Targeted or Incorrect Copy* - incorrect target
- *Other Reasons* - other

If the block is for all holds, and it is an item you own, you can select the **Allow for requests** action in the upper right of the Single Scan interface to realow requests on that item.

The screenshot shows the 'ILL Management' interface. At the top, there's a header with a home icon, the user 'staff_fel-terr @ TERR-staff', and settings/user icons. Below the header, the 'ILL Management' title is on the left. On the right, there are buttons for 'Jump to page:', 'Select page', and 'Go!'. Below these are links for 'Search the catalog' and 'Help with ILL Management'. A sidebar on the left lists navigation options: 'Single Scan' (highlighted), 'Pending Requests', 'Incoming Transits', 'Outgoing Transits', 'On Shelf', and 'Currently Circulating'. The main content area shows a 'Scan Item Barcode' input with '121008' and a 'Go!' button. Below this is the 'Item Details' section with a table:

Barcode:	121008
Status:	Reshelving
Owning Lib:	TERR
Title:	Lirael, daughter of the Clayr
Author:	Nix, Garth.
Call Number:	FIC NIX
Fulfillment Bib ID:	697

At the bottom right of the main content area, there are two buttons: 'Allow for requests' (highlighted) and 'Print Details'.

Capture Rejections shows a list of times a request has been retargeted, whether through staff action or due to the retarget interval expiring. The retarget interval is set by your administrator, and after it elapses, a non-captured request will try to find another item. The retarget interval is to ensure that even if action is not taken on a request, the request will still try to find another item.

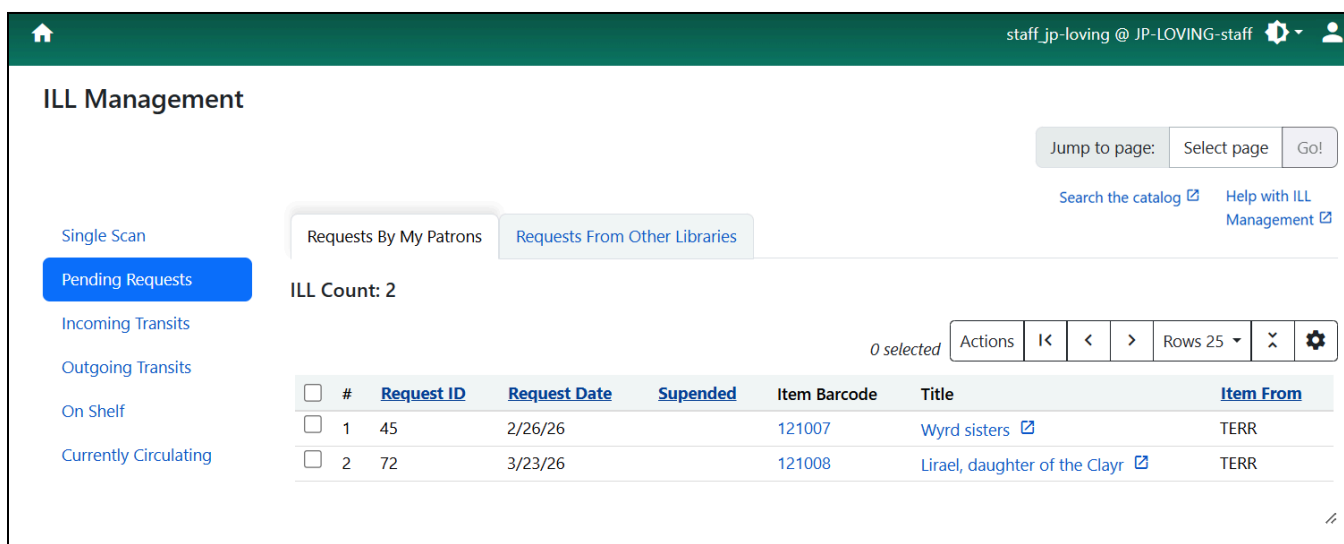

The Capture Rejections list is sorted descending by date, and shows the location, barcode, and date of any retargets. If there have not been any rejections on this request, you will not see this section.

Pending Requests

The Pending Requests tab includes sub-tabs **Requests by My Patrons** and **Requests From Other Libraries**. The Requests From Other Libraries tab also includes the **Printable Pull List**.

Requests by My Patrons

This displays a grid showing current requests for patrons of your library (and any child libraries in your hierarchy). By default this grid is ordered by Request ID (ascending), but you can re-sort the grid by clicking on any of the column headers. In the screenshot below, this is showing a request from the borrowing library's perspective.

ILL Management

Single Scan

Requests By My Patrons **Requests From Other Libraries**

Pending Requests

ILL Count: 2

0 selected

Actions | I | < | > | Rows 25 | ⌵ | ⚙

☐	#	Request ID	Request Date	Suspended	Item Barcode	Title	Item From
☐	1	45	2/26/26		121007	Wyrd sisters	TERR
☐	2	72	3/23/26		121008	Lirael, daughter of the Clayr	TERR

Clicking on a hyperlinked item barcode will open the request in the **Single Scan** interface, and will show details of the request and prompt for the next action (See [Single Scan](#) section above).

Clicking on a hyperlinked item title will show you a staff view of the bibliographic record and holdings information.

To perform actions from the Requests for My Patrons tab, select the checkbox(es) of the item(s) you wish to perform an action on. Click the checkmark at the upper left of the grid to select all visible items.

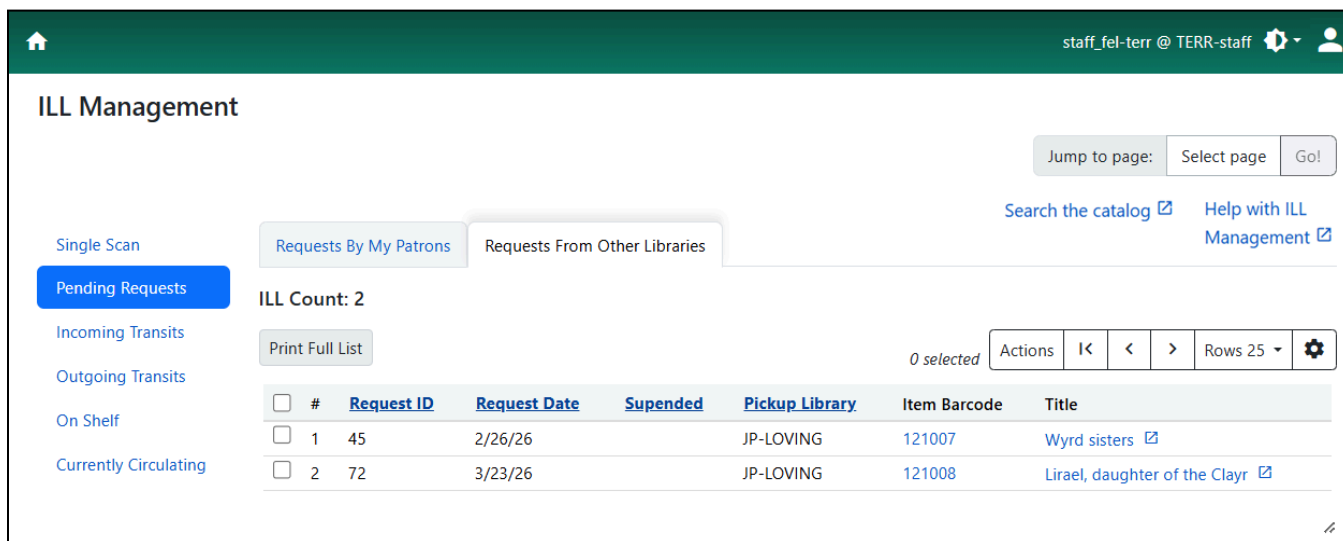

Click the **Actions** menu in the upper right corner and select your desired action, or right-click in a grid row to see the Actions menu.

Available actions are:

- **Activate Request** - this will activate a previously suspended request, or activate a request that started in a suspended state due to configuration.
- **Cancel Request** - this will cancel a request. If a request is cancelled from the Pending Requests tab, no further action is needed.
- **Modify Request** - this allows details of the request to be modified, including suspending a request, changing a pickup library, setting an active date and/or expiration date, and other information.
- **Print Request Details** - opens a print dialog to print information about all requests on the page. Printout is configurable via template.
- **Retarget Request** - this will attempt to find another item to fill the request. Note that if there are very few items, or if the selected item is still the “closest” one to fill the request, you may not see a change here.
- **Show Request Details** - this will open a detailed view of the request. Select List View to return to the list. You can also see request details via Single Scan.
- **Suspend Request** - this will suspend an active request. The request will remain suspended until it is activated.

Requests from Other Libraries

This displays a grid showing current requests for patrons of your library (and any child libraries in your hierarchy). By default this grid is ordered by Request ID (ascending), but you can re-sort the grid by clicking on any of the column headers. In the screenshot below, this is showing the same request from the lending library’s perspective.

The screenshot shows the ILL Management interface. At the top, there's a header with a home icon, the user 'staff_fel-terr @ TERR-staff', and a settings icon. Below the header, the 'ILL Management' title is on the left. On the right, there are links for 'Search the catalog' and 'Help with ILL Management'. A 'Jump to page' section includes 'Select page' and a 'Go!' button. A sidebar on the left lists navigation options: 'Single Scan', 'Pending Requests' (highlighted), 'Incoming Transits', 'Outgoing Transits', 'On Shelf', and 'Currently Circulating'. The main content area has tabs for 'Requests By My Patrons' and 'Requests From Other Libraries' (selected). Below the tabs, it says 'ILL Count: 2' and has a 'Print Full List' button. A table displays the requests with columns: #, Request ID, Request Date, Suspended, Pickup Library, Item Barcode, and Title. Two requests are listed: Request ID 45 (dated 2/26/26) and Request ID 72 (dated 3/23/26), both from JP-LOVING. The titles are 'Wyrd sisters' and 'Lirael, daughter of the Clayr'. A table control bar at the bottom shows '0 selected', 'Actions', navigation arrows, and 'Rows 25'.

#	Request ID	Request Date	Suspended	Pickup Library	Item Barcode	Title
1	45	2/26/26		JP-LOVING	121007	Wyrd sisters
2	72	3/23/26		JP-LOVING	121008	Lirael, daughter of the Clayr

Clicking on a hyperlinked item barcode will open the request in the **Single Scan** interface, and will show details of the request and prompt for the next action (See [Single Scan](#) section above).

Clicking on a hyperlinked item title will show you a staff view of the bibliographic record and holdings information.

To perform actions from the Requests from Other Libraries tab, select the checkbox(es) of the item(s) you wish to perform an action on. Click the checkmark at the upper left of the grid to select all visible items.

Click the **Actions** menu in the upper right corner and select your desired action, or right-click in a grid row to see the Actions menu.

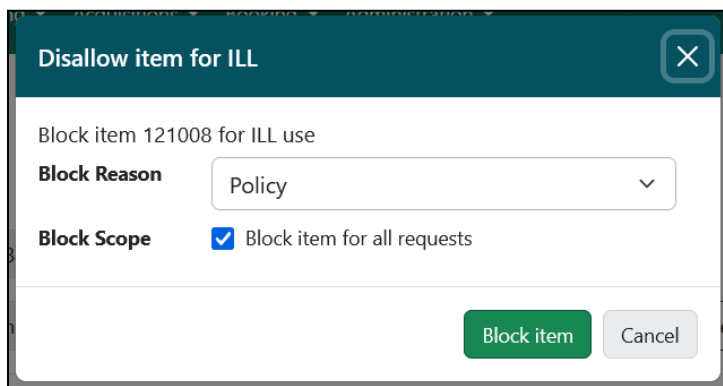

Available actions are:

- **Activate Request** - this will activate a previously suspended request, or activate a request that started in a suspended state due to configuration.
- **Capture Item** - this will capture an item for an ILL and send it into transit to the borrowing library. It is preferable to use the [Single Scan](#) interface for this action.
- **Disallow Requests** - this action will remove a specific barcode from being eligible for ILL lending, either temporarily or permanently.
- **Print Request Details** - opens a print dialog to print information about all requests on the page. Printout is configurable via template.
- **Retarget Request** - this will attempt to find another item to fill the request. Note that if there are very few items, or if the selected item is still the “closest” one to fill the request, you may not see a change here.
- **Show Request Details** - this will open a detailed view of the request. Select List View to return to the list. You can also see request details via Single Scan.
- **Suspend Request** - this will suspend an active request. The request will remain suspended until it is activated.

Disallow Item For Requests

If you receive a request for an item that you do not want to fill, you can select **Disallow item for requests** either from the Pending Requests interface, or from [Single Scan](#).

In either case, you will see a dialog:

Select a reason for your block. Reasons for an ILL block include:

- *Policy* - local policy prohibits lending this item
- *Targeted Copy or Equivalent Not Found* - the item or an equivalent replacement item were not found on the shelf
- *Incorrectly Targeted or Incorrect Copy* - the targeted copy is not associated with the requested title. In this case, you also want to check your most recent file export and/or contact your administrator or support provider.
- *Other Reasons* - another reason not specified above

If you only want to block this specific ILL request, but allow the item to be retargeted in the future, make sure the **Block item for all requests** checkbox is unchecked. If you wish to permanently block an item from being targeted for ILL requests, check the **Block item for all requests** checkbox.

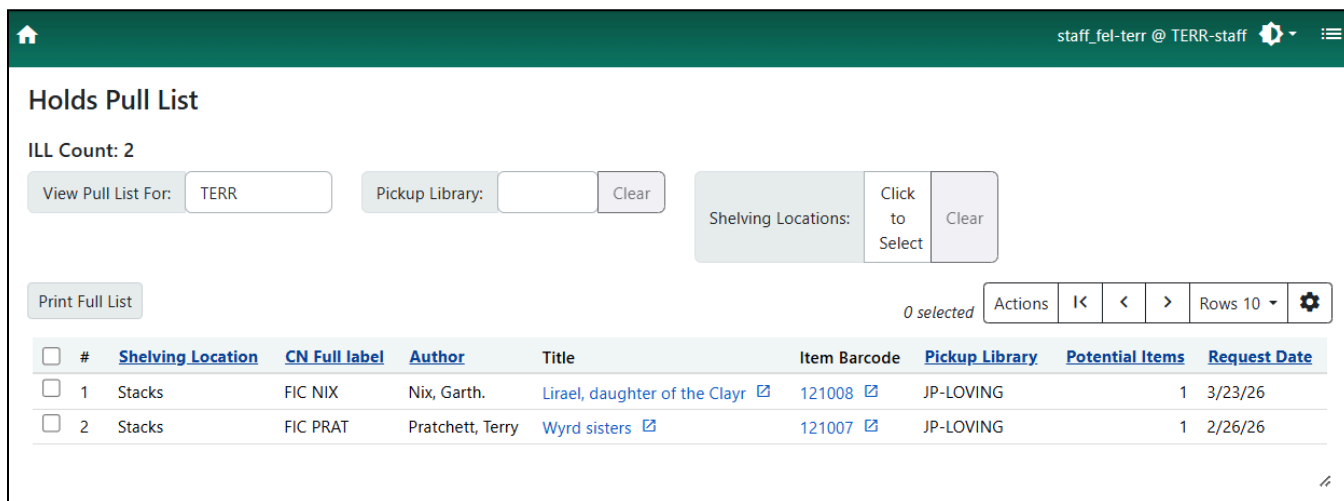

Once you have selected your reason and appropriate checkbox value, click **Block Item**. If you wish to exit without making any changes, click **Cancel**. In the future, if you wish to realow an item for requests, you can make this change from the [Single Scan](#) interface. This is described in detail above.

Pull List

In order to print a Pull List, select the **Print Full List** button. For a more sophisticated pull list interface, you can go to the **Home Screen** and select the **ILL Pull List** button.

The **Print Full List** button will open a print dialog and print your pull list based on a template.

From the more sophisticated pull list interface, you can filter by various shelving locations and pickup locations, and you also have more complex sorting options.

Holds Pull List

ILL Count: 2

View Pull List For: TERR Pickup Library: Clear

Shelving Locations: Click to Select Clear

Print Full List 0 selected Actions < > Rows 10 ⚙

#	Shelving Location	CN Full label	Author	Title	Item Barcode	Pickup Library	Potential Items	Request Date
1	Stacks	FIC NIX	Nix, Garth.	Lirael, daughter of the Clayr	121008	JP-LOVING	1	3/23/26
2	Stacks	FIC PRAT	Pratchett, Terry	Wyrd sisters	121007	JP-LOVING	1	2/26/26

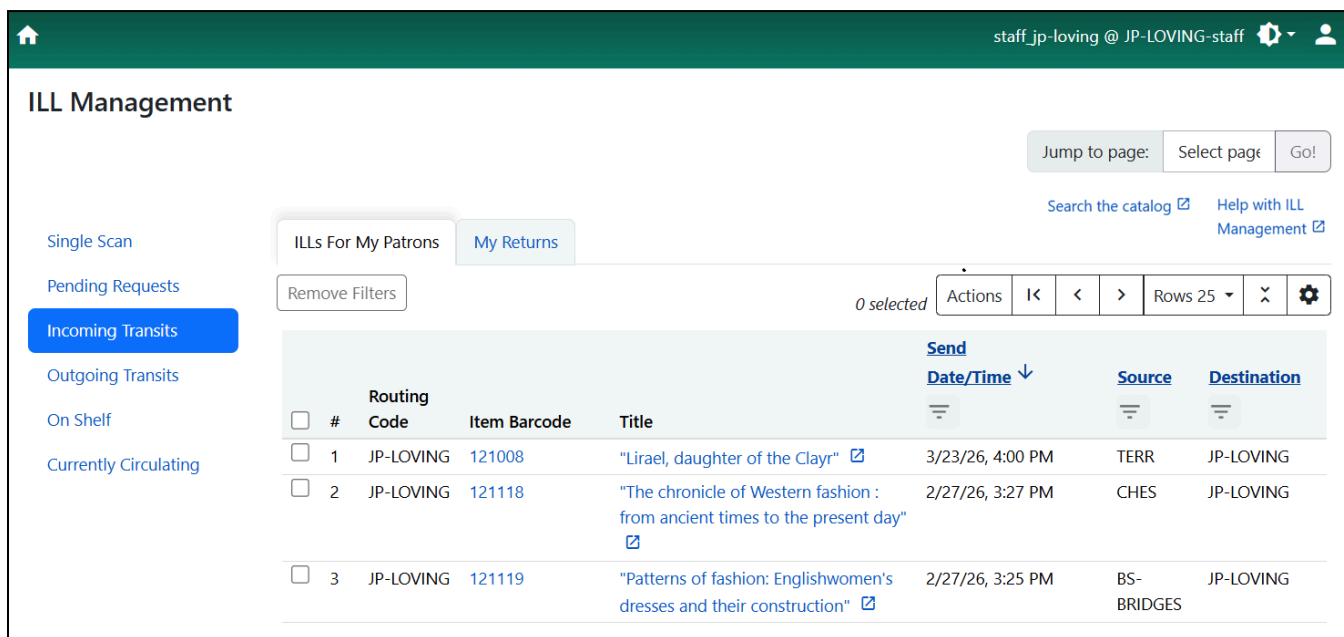

From this interface, the Print Full List button will print this list according to a template. You can also use the **Gear Icon** in the upper right and select either **Print Full Grid** or **Print Selected Rows** which will print out the view that you have configured here.

Incoming Transits

The **Incoming Transits** tab will show you transits coming into your library from other libraries. There are two subtabs, **ILLs For My Patrons** and **My Returns**.

ILLs for My Patrons

The **ILLs For My Patrons** subtab shows a grid of items that have been sent and are in route for your patrons. By default this grid is ordered by date/time (ascending), but you can re-sort the grid by clicking on any of the column headers. In the screenshot below, this is showing the same request from the borrowing library's perspective.

Remove Filters

0 selected Actions < > Rows 25

		Routing Code	Item Barcode	Title	Send Date/Time	Source	Destination
☐	#	1	JP-LOVING 121008	"Lirael, daughter of the Clayr" [link]	3/23/26, 4:00 PM	TERR	JP-LOVING
☐	2	JP-LOVING 121118	"The chronicle of Western fashion : from ancient times to the present day" [link]	2/27/26, 3:27 PM	CHES	JP-LOVING	
☐	3	JP-LOVING 121119	"Patterns of fashion: Englishwomen's dresses and their construction" [link]	2/27/26, 3:25 PM	BS-BRIDGES	JP-LOVING	

Clicking on a hyperlinked item barcode will open the request in the **Single Scan** interface, and will show details of the request and prompt for the next action (See [Single Scan](#) section above).

Clicking on a hyperlinked item title will show you a staff view of the bibliographic record and holdings information.

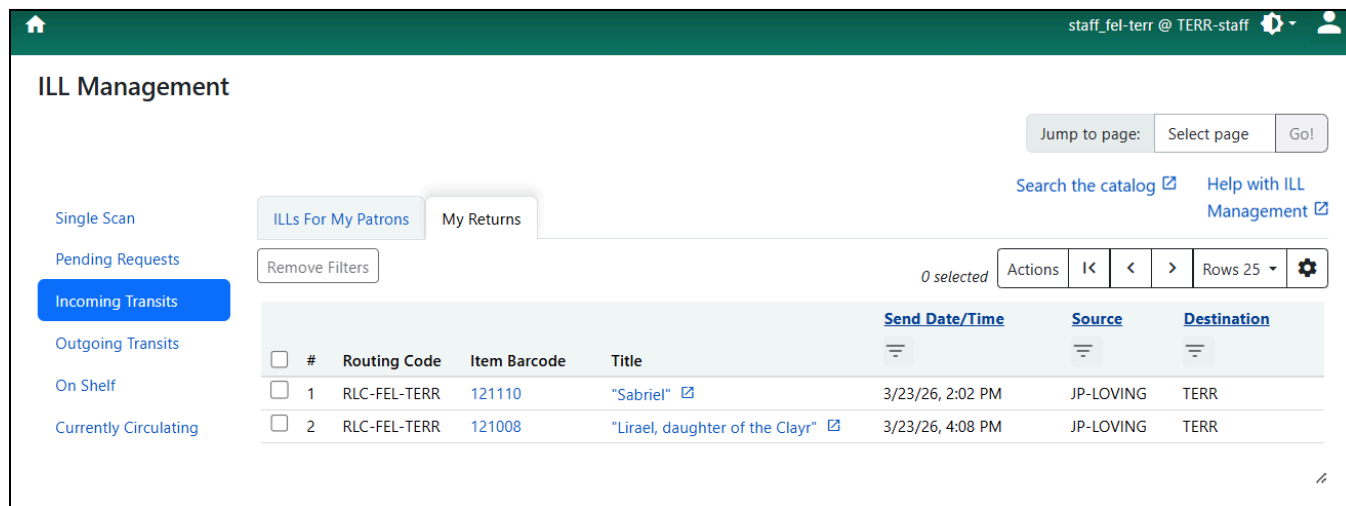

To perform actions from the For My Patrons tab, select the checkbox(es) of the item(s) you wish to perform an action on. Click the checkmark at the upper left of the grid to select all visible items.

Click the **Actions** menu in the upper right corner and select your desired action, or right-click in a grid row to see the Actions menu.

The only available action in this grid is **Cancel Requests**. Since the item is already in transit to your library, when the item arrives you will need to scan it into **Single Scan** to send the item along to its next location.

My Returns

The **My Returns** subtab shows a grid of items that have been lent to other libraries and are on their way back to your library. By default this grid is ordered by date/time (ascending), but you can re-sort the grid by clicking on any of the column headers. In the screenshot below, this is showing the same request from the lending library's perspective.

The screenshot shows the ILL Management interface. The top navigation bar includes a home icon, the user 'staff_fel-terr @ TERR-staff', and settings and user profile icons. The main header is 'ILL Management'. On the left, there is a sidebar with links: 'Single Scan', 'Pending Requests', 'Incoming Transits' (highlighted in blue), 'Outgoing Transits', 'On Shelf', and 'Currently Circulating'. The main content area has two tabs: 'ILLs For My Patrons' and 'My Returns' (selected). Below the tabs is a 'Remove Filters' button. To the right of the tabs, there is a 'Jump to page:' section with 'Select page' and 'Go!' buttons, and links for 'Search the catalog' and 'Help with ILL Management'. Below this is a table with columns: '#', 'Routing Code', 'Item Barcode', 'Title', 'Send Date/Time', 'Source', and 'Destination'. The table contains two rows of data. The first row has a checkbox, #1, Routing Code RLC-FEL-TERR, Item Barcode 121110, Title 'Sabriel', Send Date/Time 3/23/26, 2:02 PM, Source JP-LOVING, and Destination TERR. The second row has a checkbox, #2, Routing Code RLC-FEL-TERR, Item Barcode 121008, Title 'Lirael, daughter of the Clayr', Send Date/Time 3/23/26, 4:08 PM, Source JP-LOVING, and Destination TERR. Above the table, there is a '0 selected' status and an 'Actions' button. To the right of the table, there are navigation buttons: 'IK', '<', '>', 'Rows 25', and a settings gear icon.

	#	Routing Code	Item Barcode	Title	Send Date/Time	Source	Destination
☐	1	RLC-FEL-TERR	121110	"Sabriel"	3/23/26, 2:02 PM	JP-LOVING	TERR
☐	2	RLC-FEL-TERR	121008	"Lirael, daughter of the Clayr"	3/23/26, 4:08 PM	JP-LOVING	TERR

Clicking on a hyperlinked item barcode will open the request in the **Single Scan** interface, and will show details of the request and prompt for the next action (See [Single Scan](#) section above).

Clicking on a hyperlinked item title will show you a staff view of the bibliographic record and holdings information.

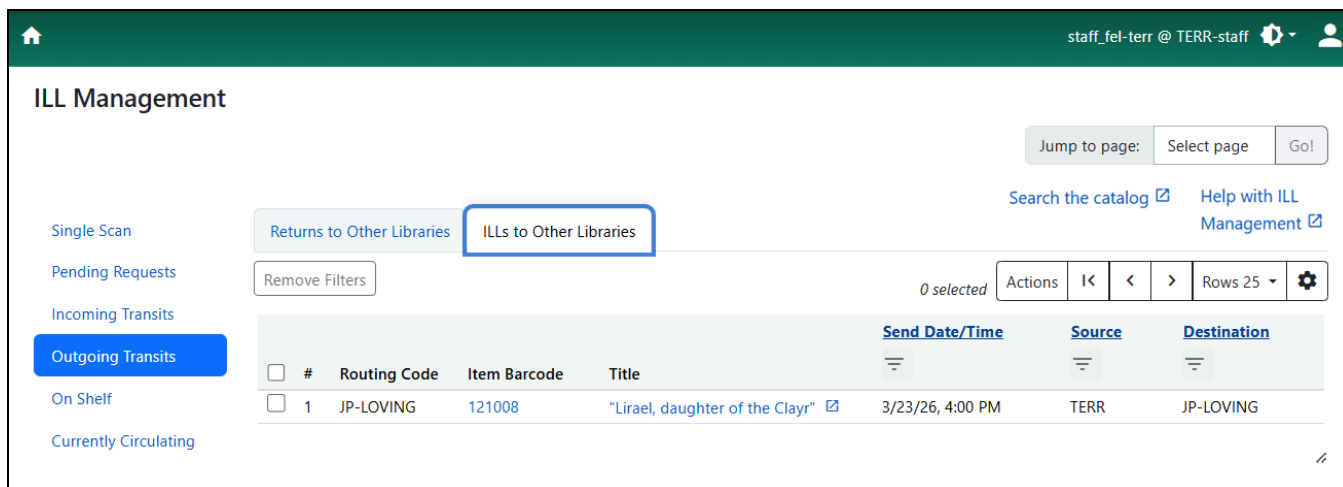

There are no actions available from this tab.

Outgoing Transits

The **Outgoing Transits** tab will show you transits that have left your library and are on their way to another library. There are two subtabs, **ILLs to Other Libraries** and **Returns to Other Libraries**.

ILLs to Other Libraries

The **ILLs to Other Libraries** subtab shows a grid of items that have been lent to other libraries by you and are on their way to the borrowing library. By default this grid is ordered by date/time (ascending), but you can re-sort the grid by clicking on any of the column headers. In the screenshot below, this is showing the same request from the lending library's perspective.

☐	#	Routing Code	Item Barcode	Title			
☐	1	JP-LOVING	121008	"Lirael, daughter of the Clayr"	3/23/26, 4:00 PM	TERR	JP-LOVING

Clicking on a hyperlinked item barcode will open the request in the **Single Scan** interface, and will show details of the request and prompt for the next action (See [Single Scan](#) section above).

Clicking on a hyperlinked item title will show you a staff view of the bibliographic record and holdings information.

Click the **Actions** menu in the upper right corner and select your desired action, or right-click in a grid row to see the Actions menu.

The only available action in this grid is **Abort Transit** - this will cancel the item's transit. If you abort a transit, you will need to return to **Single Scan** to either re-capture the item for ILL or retarget the request to another item. You should not use Abort Transit for an item that has physically left your location.

Returns to Other Libraries

The **Returns to Other Libraries** subtab shows a grid of items that had been borrowed by your patron and are on their way back to their owning library. By default this grid is ordered by date/time (ascending), but you can re-sort the grid by clicking on any of the column headers. In the screenshot below, this is showing the same request from the borrowing library's perspective.

Clicking on a hyperlinked item barcode will open the request in the **Single Scan** interface, and will show details of the request and prompt for the next action (See [Single Scan](#) section above).

Clicking on a hyperlinked item title will show you a staff view of the bibliographic record and holdings information.

Click the **Actions** menu in the upper right corner and select your desired action, or right-click in a grid row to see the Actions menu.

The only available action in this grid is **Checkout Item** - this will check the item out to your patron. It is preferable to use the [Single Scan](#) interface for this action.

At Other Libraries

The **At Other Libraries** subtab shows a grid of items that have been loaned by your library and are on the holds shelf and available for pickup for other libraries' patrons. By default this grid is ordered by

date/time (ascending), but you can re-sort the grid by clicking on any of the column headers. In the screenshot below, this is showing the request from the lending library's perspective.

The screenshot shows the 'ILL Management' interface. At the top, there's a header with a home icon, the user 'staff_fel-terr @ TERR-staff', and a profile icon. Below the header, the title 'ILL Management' is on the left. On the right, there's a 'Jump to page:' section with 'Select page' and 'Go!' buttons, and links for 'Search the catalog' and 'Help with ILL Management'. A sidebar on the left lists navigation options: 'Single Scan', 'Pending Requests', 'Incoming Transits', 'Outgoing Transits', 'On Shelf' (highlighted in blue), and 'Currently Circulating'. The main content area has two tabs: 'For My Patrons' and 'At Other Libraries' (which is selected and highlighted with a blue border). Below the tabs, it says 'ILL Count: 1'. To the right of the count is a '0 selected' status and a row of action buttons: 'Actions', 'I<', '<', '>', 'Rows 25', and a settings gear icon. The main table has columns: '#', 'Request ID', 'Current Shelf Library', 'Item Barcode', 'Title', 'Available Date', 'Patron Barcode', and 'Shelf Expire Time'. There is one row of data with a checkbox in the first column, and values: 1, 72, JP-LOVING, 121008, Lirael, daughter of the Clayr (with a small blue icon), 3/23/26, 4:03 PM.

#	Request ID	Current Shelf Library	Item Barcode	Title	Available Date	Patron Barcode	Shelf Expire Time
1	72	JP-LOVING	121008	Lirael, daughter of the Clayr	3/23/26, 4:03 PM		

Clicking on a hyperlinked item barcode will open the request in the **Single Scan** interface, and will show details of the request and prompt for the next action (See [Single Scan](#) section above).

Clicking on a hyperlinked item title will show you a staff view of the bibliographic record and holdings information.

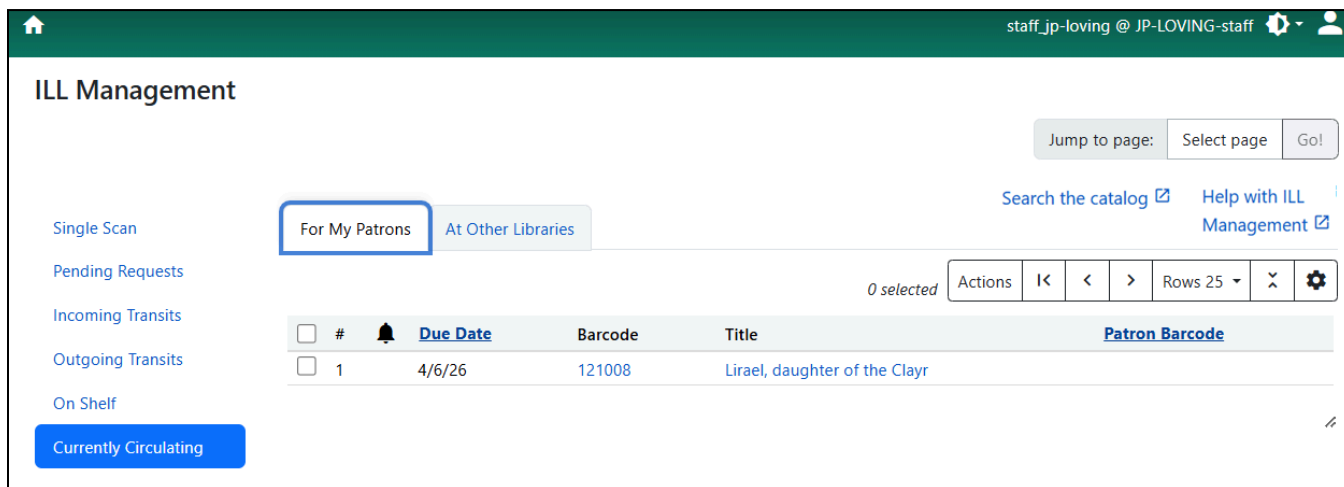

There are no actions available from this grid.

Currently Circulating

The **Currently Circulating** tab will show you items currently checked out in Fulfillment. There are two subtabs, **For My Patrons** and **At Other Libraries**.

For My Patrons

The **For My Patrons** subtab shows a grid of items that have been borrowed by your patrons and are currently checked out in Fulfillment. By default this grid is ordered by date/time (ascending), but you can re-sort the grid by clicking on any of the column headers. In the screenshot below, this is showing the request from the borrowing library's perspective.

Clicking on a hyperlinked item barcode will open the request in the **Single Scan** interface, and will show details of the request and prompt for the next action (See [Single Scan](#) section above).

Clicking on a hyperlinked item title will show you a staff view of the bibliographic record and holdings information.

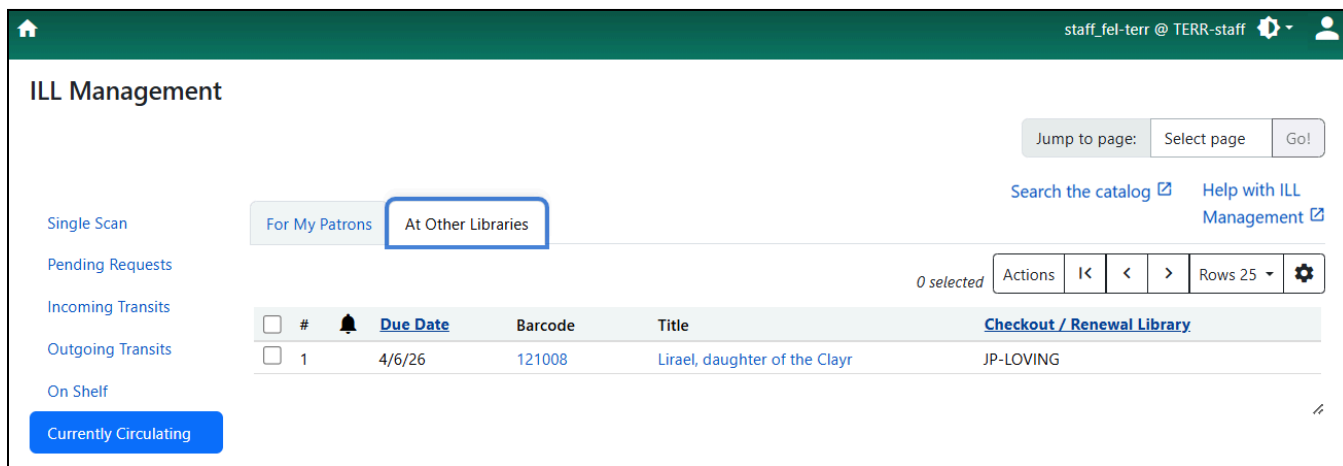

Click the **Actions** menu in the upper right corner and select your desired action, or right-click in a grid row to see the Actions menu.

Available actions are:

- **Check Item In** - this will check in the ILL and initiate a transit to the next library on the request list, or a transit back to the home library if there are no additional requests. It is preferable to use the [Single Scan](#) interface for this action.
- **Mark Lost By Patron** - this will mark the ILL as lost by the patron. If configured, this will send a notice to the lending library. It is preferable to use the [Single Scan](#) interface for this action.

At Other Libraries

The **AtOther Libraries** subtab shows a grid of items that have been lent by your library and are currently checked out in Fulfillment to their borrowing patrons. By default this grid is ordered by date/time (ascending), but you can re-sort the grid by clicking on any of the column headers. In the screenshot below, this is showing the request from the lending library's perspective.

Clicking on a hyperlinked item title will show you a staff view of the bibliographic record and holdings information.

Click the **Actions** menu in the upper right corner and select your desired action, or right-click in a grid row to see the Actions menu.

There are no actions available from this grid.

Searching the Catalog and Placing a Request

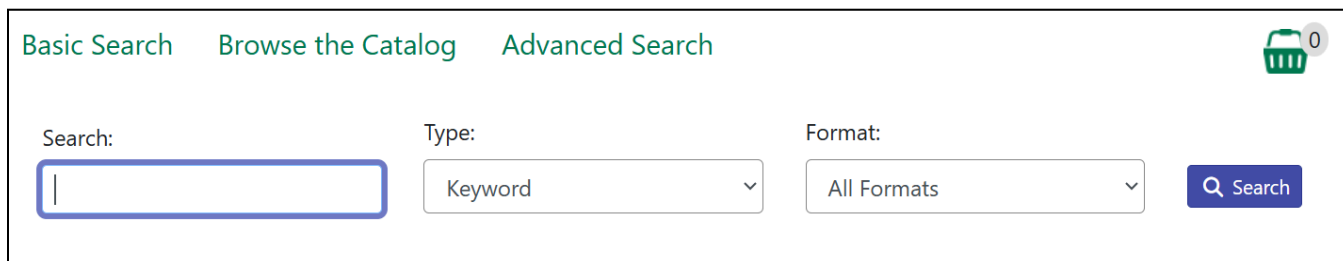

To place a request in Fulfillment, click the **Search the Catalog** link in the upper right corner of the Management Interface. This will open a new browser tab with a staff-focused view of your catalog, which includes all holdings from your consortium partners even if they are not lending these items.

Search Options

There are three search options in Fulfillment: **Basic Search** (default), **Advanced Search**, and **Browse Search**.

Basic Search

In **Basic Search** you can enter single or multiple search terms in the search box. Using the **Type** dropdown, you can select the index to search in: Keyword, Title, Journal Title, Author, Subject, or Series. Indexes are configured by your system administrator. In the **Format** dropdown you can select any one of a number of desired formats for your search. Format is drawn from MARC record fixed field data, and the collective groupings of “All books”, “All Music”, etc. are configured by your system administrator.

The screenshot shows the 'Basic Search' tab selected in a navigation bar. Below the navigation bar are three tabs: 'Basic Search', 'Browse the Catalog', and 'Advanced Search'. To the right of these tabs is a shopping cart icon with a '0' next to it. Below the tabs is a search form with three main sections: 'Search:', 'Type:', and 'Format:'. The 'Search:' section contains a text input field with a blue border. The 'Type:' section contains a dropdown menu with 'Keyword' selected. The 'Format:' section contains a dropdown menu with 'All Formats' selected. To the right of these sections is a blue 'Search' button with a magnifying glass icon.

In general, most of your search needs should be addressable in Basic Search.

Advanced Search

In **Advanced Search** you can construct a search across indexes and join search statements with Boolean operators. Each search statement allows you to select an index, a match operator, and then enter terms. You can add search statements with AND or OR operators. To add a new search statement, click **Add Search Row**. To remove a search statement, click the **X** at the end of the row.

Match operators include the following:

- *Contains* - the selected search index contains the search term, including stemmed variants
- *Does not contain* - the selected search index does not contain the search term, including stemmed variants
- *Contains phrase* - the selected search index contains the entire phrase as a quote, i.e., adjacent words match exactly without stemming
- *Matches exactly* - the selected search index contains the precise search string, right- and left-anchored, excluding stemmed variants

- *Starts with* - the selected search index contains the search term(s) as a left-anchored search, akin to a browse search.

In addition, you can select one or several filters to apply pre-search. Filters are primarily drawn from MARC record data. Filters drawn from MARC data include Item Type, Item Form, Language, Audience, Video Format, Bib Level, Literary Form, and Publication Year.

Other filters include:

- *Search Library* - this will default to your library.
- *Sort Results*- by default this will sort by relevance, but you can also choose to sort by Title, Author, Publication Date, and (if configured) Popularity.
- *Limit to Available* - this checkbox will only show results that are available. Please note that not all participants in your Fulfillment system may have real-time availability information.
- *Group Formats and Editions* - this checkbox will collect formats and editions of the same title and group them into a set, which allows the requestor to place a hold across all or selected members of the set. More information is below in the **Place ILL Request** section.

Advanced Search also includes **Numeric Search** and **Expert Search** options.

Numeric Search

Numeric Search allows you to pick a numeric index and enter a search value. Available indexes include:

- *ISBN* - International Standard Book Number, configured based on MARC data
- *ISSN* - International Standard Serial Number, configured based on MARC data
- *UPC* - Universal Product Code, configured based on MARC data
- *LCCN* - Library of Congress Control Number, configured based on MARC data
- *TCN* - Title Control Number, either configured based on MARC data or database ID number depending on your Fulfillment setup
- *Call Number (Shelf Browse)* - Call Number information in the holdings record. Note that this will include all call numbers present in holdings records in the system regardless of call number type (Library of Congress, Dewey, other)
- *Item Barcode* - A barcode attached to a specific item in the system

The Numeric Search also includes a filter for *Search Library* which will default to your library.

Expert Search

If you are familiar with MARC tags and subfields, you can use Expert Search to create a set of tags, subfields, and values to search. Click **Add Search Row** to add another search row. Search rows are combined with an implicit AND operator. Click the **X** at the right end of the search row to remove the search row. Note that a MARC search is more resource intensive than a regular search and may be slower to return results. We recommend using this search as a last resort.

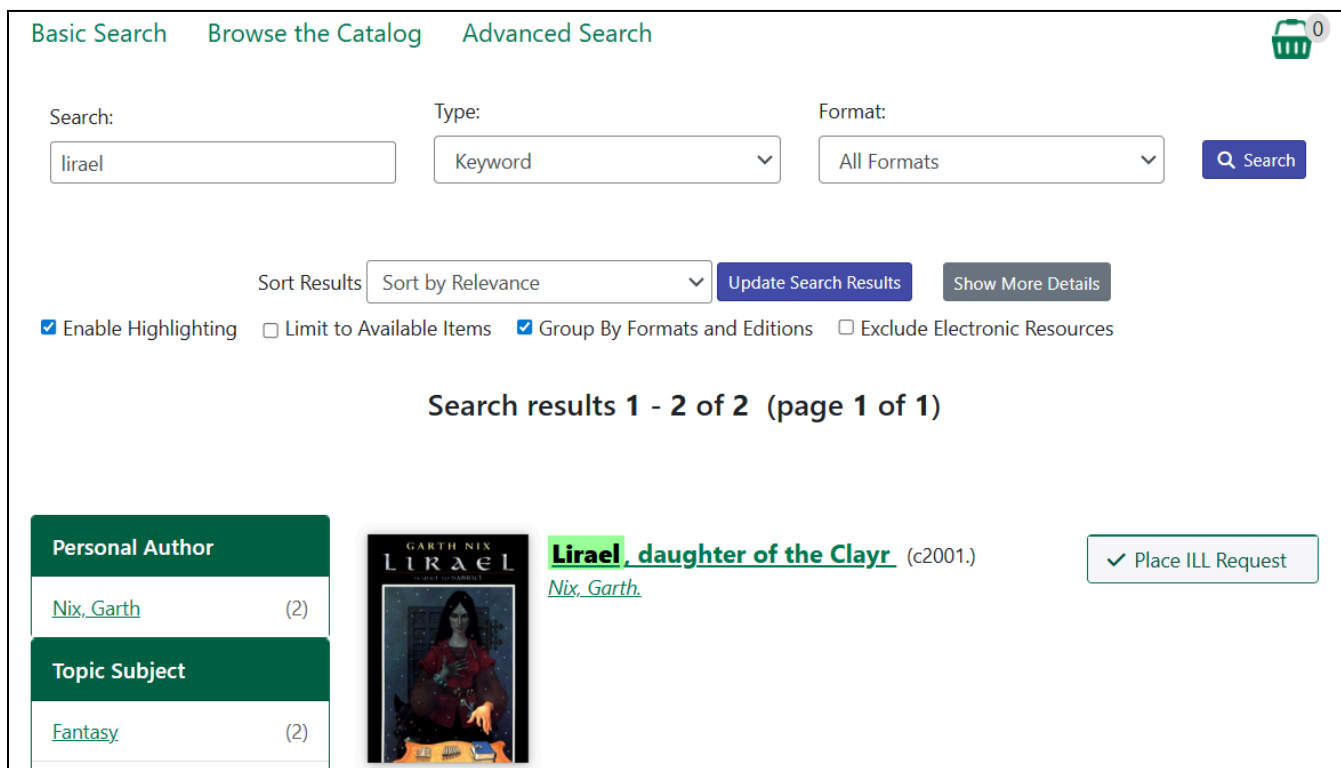

The Expert Search also includes a filter for *Search Library* which will default to your library.

Browse Search

In **Browse Search**, you can select an index of Titles, Authors, Subjects, or Series and enter search values in the box labeled *Starting With*. This will perform a left-anchored browse search and the results will show your search terms within context in the browse index. The number in parentheses indicates the number of bib records matching the index term. Click on the index term to open a search results page. There is also a *Search Library* filter on this search which will default to your library.

Search Results

The **Search Results** gives you a list of titles that match your search parameters. Each title can include multiple formats and editions, if this option was selected at search (this option is selected by default in Fulfillment search). Titles will list format(s) available underneath the title, and if there is more than one bibliographic record represented in the title, this is indicated by a numeral in parentheses following the title.

The screenshot shows the search results page for the query "lirael". The interface includes navigation tabs for "Basic Search", "Browse the Catalog", and "Advanced Search". A search bar contains the text "lirael", and the "Type" is set to "Keyword" and "Format" to "All Formats". A "Search" button is present. Below the search bar, there are options to "Sort Results" (set to "Sort by Relevance"), "Update Search Results", and "Show More Details". Checkboxes for "Enable Highlighting", "Limit to Available Items", "Group By Formats and Editions", and "Exclude Electronic Resources" are visible. The results are displayed as "Search results 1 - 2 of 2 (page 1 of 1)". On the left, a sidebar shows "Personal Author" with "Nix, Garth (2)" and "Topic Subject" with "Fantasy (2)". The main result shows the book cover for "LIRAEI" by Garth Nix, with the title "Lirael, daughter of the Clayr (c2001.)" and the author "Nix, Garth." highlighted. A "Place ILL Request" button is on the right.

On the left hand side of the screen are several post-search refinement options, including the ability to change results sorting as well as limit the search results set by author, series, genre, or subject.

Placing a Request

If there are copies available to request, you will see the **Place ILL Request** button on the right side of each title result. Click this button to go to the request form.

Place ILL Request

☐ Place hold for patron by barcode:

☒ Place this hold for me (Loving Staff)

☒ Override all hold-blocking conditions possible?

Lirael, daughter of the Clayr

Pickup location:

Notify when hold is ready for pickup?

☒ Yes, by Email : **email@domain.com**

☒ Yes, by Phone

Phone Number:

☐ Suspend this hold?

Select your desired formats and languages

Formats

If none are selected, any available formats may be used.

Languages

Select your desired language(s).
If none are selected, any available languages may be used.

The request form will ask you to select some options:

- **Requesting party**
 - *Place hold for patron by barcode* - enter the barcode of the requesting patron in the box. If you have a Connector enabled, this will allow full automation of the request including automated checkout if it is enabled. If you do not have a Connector enabled, the patron barcode will be attached to the request for informational purposes.
 - *Place hold for me* - this will place the hold for your staff user account. Typically this is a proxy account associated with your staff login.
- **Pickup location**
 - This will default to the library associated with your staff login.
 - You can change the pickup library if needed.
- **Notification Options**
 - These default to the borrowing library's information.
- **Suspend this hold?**
 - Select this checkbox to suspend the hold. Optionally, enter a date to activate the request.
 - Suspended holds will not actively search for items unless and until the hold is activated.

- Note that your administrator may elect to start all holds as suspended in order to allow staff review before the request goes out to the larger system.
- *Select your desired format(s)*
 - This will show all formats available for request. Select your preferred format(s).
 - You can use CTRL click to select multiple formats.
 - If you do not select a format, your request may be filled with any of the formats listed.
- *Select your desired language(s)*
 - This will show all languages available for request. Select your preferred language(s).
 - You can use CTRL click to select multiple languages.
 - If you do not select a language, your request may be filled with any of the languages listed.

Click **Submit** to place your request. You will get either a confirmation message or a failure message depending on whether or not your request is successful.

Place ILL Request

✔ ILL Request was successfully placed for:
Lirael, daughter of the Clayr / Garth Nix.

[← Back To Search](#) [Place another hold for this title](#)

Once a request is successfully placed it will be visible in the **Pending Requests** → **Requests for My Patrons** interface.
